Note 1: The substance composition of Samtec products is part specific. **Options are available for the majority of the part series listed above that, if selected, can render a RoHS2 compliant part non-compliant. Please review individual part call-outs for RoHS2 compliancy.** The information provided in this document by Samtec Corporation is based upon technical data believed to be reliable and is accurate to the best of our knowledge. The information is subject to change as new experience and knowledge is gained.

Note 2: This product series may include copper alloy components containing intentionally added lead (Pb). The copper alloy components, if included, may contain a quantity of lead exceeding the CRoHS MCV homogeneous material limit thereby requiring CRoHS reporting. If included, the quantity of lead will be within the "lead-in-copper alloy" exemption of the EU RoHS2 Directive 2011/65/EU (RoHS2 Annex Exemption 6c).

Note 3: The substance composition and environmental compliance status of the following part series is part specific; ACD (Automotive Certified Designs), ASP (Application Specific Product), HDR (Application Specific Data Rate), RSP (Application Specific RF Products), SEP (Special Engineered Project). Verify part composition and EU/China environmental directive compliance status through Product Environmental Compliance Support Group (PEC). **Valid part number required.**

\* EU REACH denotes certification of product compliancy to European Union REACH Regulation EC 1907/2006 and ECHA SVHC Candidate List (current as of June 2016). It should be noted that Samtec exports only articles to the European Union. Consequently, registration is not required.

\*\* EU RoHS2 Directive denotes certification of product compliancy to European Union Directive 2011/65/EU including compliance with Directive 2015/863/EU and the Annex annulment of the deca-BDE exemption.

\*\*\* China RoHS Compliant denotes product meets current MCV criteria for the six banned substances (Cd, CrVI, Hg, Pb, PBBs and PBDEs) listed in the "Management Methods for Controlling Pollution by Electronic Information Products" law promulgated by the Chinese Ministry of Information Industry -- commonly known as China RoHS or CRoHS Directive (series exceptions flagged as per Note 2)

*Product environmental disclosure is not to be construed as a warranty or quality specification. Environmental regulatory information is for guidance purposes only. Product users are responsible for determining the applicability of legislation and regulations based on their individual usage of the product.*
