

INDUSTRIAL AUTOMATION

Samtec delivers Sudden Service[®] solutions that meet the sensor, controller and communication network requirements of today's industrial automation applications. Industry-leading expertise in rugged/power and high-performance interconnect systems, combined with on-going **Extended Life Product™** and **Severe Environment Testing** initiatives, enables quick-turn, cost-effective options for the performance, reliability and durability demands of industrial automation applications. For more information, visit **samtec.com/industrial-automation** or contact **SIG@samtec.com**.

Product Features & Benefits

- Signal integrity-optimized solutions
- High-reliability / rugged contact systems
- Flexible / customizable board stacking options
- Small form factors / ultra-high densities
- High vibration and high mating cycle systems
- High power interfaces

Design & Development Support

- Free online tools & resources: 3D Models, Prints, Picture Search & Solutionator[®] product builders
- Extensive testing initiatives that surpass typical industry standards and specifications
- Industry-leading component and system-level engineering expertise

Severe Environment Testing

SET is a Samtec initiative to test products beyond typical industry standards and specifications.

Products undergo additional testing to ensure they are *more than suitable* for military, space, automotive, industrial and other extreme applications.

For additional information and current test results, please visit **samtec.com/SET** or contact **SET@samtec.com**.

Extended Life Product™

E.L.P.™ products are tested to rigorous standards that evaluate contact resistance in simulated storage and field conditions. These include:

10 year Mixed Flowing Gas (MFG)

High Mating Cycles (250 to 2,500)

For complete details about the E.L.P.[™] program and a full list of qualifying products and test results, please visit **samtec.com/ELP** or contact **ASG@samtec.com**.

EXPRESS MODIFICATIONS & ENGINEERED CUSTOMS

Samtec offers express modification and engineered custom products with low or no NRE charges, quick-turn samples, short lead times, and low or no MOQs. Customization is possible across every product category – from Silicon-to-Silicon™. Contact **ASP@samtec.com**.

CONTACT SYSTEM FLEXIBILITY

Samtec offers a contact system for any application need from high-reliability and high-retention, to signal integrity optimized and extremely rugged. Visit **samtec.com/contact-systems** to learn more.

Samtec's most rugged contact system rated to 1,000 mating cycles with multiple points of contact for high-reliability.

INTERCONNECT SOLUTIONS

Flexible Stacking Systems

Samtec offers the industry's largest variety of board stacking

samtec.com/flexiblestacking

interconnects, available in a variety of pitch, density, stack

height, orientation, and contact system options.

High-Speed Board-to-Board

High-performance mezzanine and backplane systems with contact durability, optimized signal integrity, integral ground planes, high-density pin counts and ultra fine pitches.

High-Speed Edge Card Systems

Choice of pitch, orientation and pin count with performance to 64 Gbps PAM4 and PCIe® solutions.

High-density, open-pin-field design for maximum routing, grounding and

Rugged SI Edge Rate® Strips

......

Signal integrity optimized, high-cycle contacts with a choice of pitch, stack height and ruggedizing features.

Rugged I/O Systems

RATE

Power I/O, extreme optics and IP67/IP68 sealed solutions with high-reliability contacts and a variety of rugged options.

samtec.com/edgerate

High-Reliability Tiger Eye[™]

Rated to 1,000+ cycles with a choice of pitch, termination, rugged features, and mating discrete wire or IDC cable systems.

High Power Systems

Rugged, high power interconnect systems (up to 60 A) are available in small form factors with flexible designs.
