

CO-OP PROGRAM

The co-op program is an important part of Samtec's commitment to education and investment in talent. Samtec co-ops complete real-world projects, gain valuable on-the-job skills, make meaningful contributions to Samtec initiatives, and expand their network as they move through the multi-year program. Many go on to full-time positions within the company after graduation. At any given time, Samtec has approximately 90-100 co-ops working in its different global locations. See back for more information on locations.

CO-OP CAREER FIELDS

Samtec offers four or more rotational opportunities within each discipline for co-ops who join the program as college sophomores or first-semester juniors, spending approximately 20 hours/week in the office.
