

Power Mate <sup>®</sup> Connector Series: PMSD and PMSS Series CAT-EX-169-01 - Extraction Tool **Instruction Sheet** 

STS-N-002 Rev. D

Date: 9/24/2014

# **FIGURE 1**

#### 1. INTRODUCTION

Contacts can be safely removed from a housing cavity by using the extraction tool shown in **Figure 1**. This instruction sheet covers the use of the SAMTEC Extraction Tool CAT-EX-169-01. These tools are intended to aid in the removal of the CC69X, Power Mate <sup>®</sup> contacts from the housing.

### 2. CUSTOMER SERVICE

Further tooling and product application assistance is available by contacting the **Samtec Application Service Line - (+1-800-726-8329 (+1-812-944-6733))** 8:00 AM to 5:00 PM eastern time. To expedite your inquiry, have the pertinent part numbers for the product and tooling.

Power Mate <sup>®</sup> Connector Series: PMSD and PMSS Series CAT-EX-169-01 - Extraction Tool Instruction Sheet STS-N-002 Rev. D

Date: 9/24/2014

### 3. DESCRIPTION

Each tool handle is marked with the tooling number. Make sure it matches the tooling number specified in this document.

The CC69X Power Mate <sup>®</sup> contact has a retaining lance that can be released through an access cavity located in the front of the housing as shown in **Figure 2**. The Extraction tool has a tip that is inserted into the cavity to depress the lance the correct amount for contact removal.

**CAUTION -** Do not use any unintended tools to release the lance. This can cause damage to the lance and weaken its ability to retain the reinserted contact in the housing.

# 4. EXTRACTION PROCEDURE

The following steps are recommended:

- 1. Push the desired lead forward to the bottom of its cavity. This will provide clearance for the lance to be depressed.
- 2. Engage the tip of the Extraction Tool in the lance cavity as shown in **Figure 2**. With downward pressure, push the tool toward the back of the window to release the lance.
- 3. Maintain downward pressure on the tool tip then grip the lead and pull the contact from its cavity.
