**Date:** July 23, 2024

**Subject:** Third-Party Material Testing

Samtec is committed to monitoring and maintaining compliance with all applicable international environmental laws, regulations, and ensuring alignment with best practices in the industry. Samtec requires the same level of compliance from our vendors and will continue to routinely request confirmation from our suppliers that there have been no changes to material compositions that would impact environmental reporting status. Consequently, routine third-party ICP test results are no longer conducted.

This decision by Samtec is based on:

- Our ability to obtain vendor data confirming compliance to environmental requirements.
- Multiple years of third-party test data showing no significant or reportable changes in material composition.
- The economic impracticality of routinely testing homogenous materials.

Samtec will review this strategy on an annual basis to ensure we remain aligned with international and domestic environmental compliance requirements. In place of routine third-party testing, we are pleased to continue to offer the following resources:

- **Full Material Declarations:** Available through our webtools at [www.samtec.com/tools/material-declaration](http://www.samtec.com/tools/material-declaration)
- **Certificates of Compliance for REACH/RoHS and other environmental concerns:** Accessible via our webtools at [www.samtec.com/tools/rohs](http://www.samtec.com/tools/rohs) or by contacting our Product Environmental Compliance Team at [PEC.mailbox@samtec.com](mailto:PEC.mailbox@samtec.com).

If you have any questions or require further information, please do not hesitate to reach out to our Product Environmental Compliance team at [PEC.mailbox@samtec.com](mailto:PEC.mailbox@samtec.com)

Thank you for your continued interest in Samtec products.

Respectfully,

A handwritten signature in black ink that reads "Joe Schaefer". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.
